DANISH ENERGY AGENCY TENDER

Tender for storage obligations

Filling of Gas Storage for the Winter of 2026-2027

Find out more about Denmark's approach to meeting the EU gas storage target ahead of winter 2026-2027.

Procurement of Gas Storage Obligation

On behalf of the government, the Danish Energy Agency is planning to repeat the tender of last year aimed at increasing gas storage levels ahead of the winter of 2026-2027 and contributing to Denmark meeting its national filling target of 75 percent storage level between 1 October and 1 December 2026.

The procurement of storage obligations will be carried out through one or more tenders in a dynamic purchasing system. The tender notice are available on EU's TED-platform. Interested market participants can be prequalified in the tender system Ethics where the tender documents are available and where market participants may submit binding offers. Link to both EU's TED-platform and the tender system Ethics is shown here: <https://ted.europa.eu/en/notice/-/detail/482337-2026> →

Danish Energy Agency has in July announced for public tender for storage obligations for the upcoming winter season.
